Saint-Gobain Ecophon

Module 6: Designing for dementia and elderly care

Content:

This CPD explores the never more relevant question of acoustic design for an aging population. This interactive seminar discusses the effects of aging and dementia on hearing, vision and mobility; explaining key design and acoustic principles when designing for dementia care.

If you would like to learn more about the subjects covered in the presentations, or to make a booking, please contact our team at marketing@ecophon.co.uk.

Module 1: Ceiling design and room acoustics
Module 2: Acoustics in education
Module 3: Acoustics for SEN teaching
Module 4: Acoustics for further and higher education
Module 5: The impact of acoustics on care and recovery
Module 6: Designing for dementia and elderly care
Module 7: Acoustic Design of the Modern Office
Module 8: Psychoacoustics in the workplace
Module 9: Acoustics in retail and leisure
Module 10: Acoustics in clean industry / high care environments
Module 11: Acoustic design for international projects
