

# Ecophon Focus<sup>TM</sup> A

Ecophon Focus™ A has an exposed grid system with easily demountable tiles. For applications where a robust suspended ceiling system is required. Improves absorption in the low frequency range, Ecophon Extra Bass can be installed on top of the suspended ceiling.

#### Cradle to Cradle Certified®

This product is Cradle to Cradle Certified® at Bronze level (version 4.0).

#### **Material Health**

This product has received a C2C Certified Material Health Certificate<sup>TM</sup> at the Silver level (standard version 4.0). The C2C Certified Material Health Certificate<sup>TM</sup> is a verification of the health and safety of a product's composition using the Material Health requirements of the Cradle-to-Cradle Certified Product Standard.

#### **Environmental Footprint**

|         | kg CO2 equiv/m² | Life-cycle stages A1 to C4 from EPD, in conformity with ISO 14025 / EN 15804 |
|---------|-----------------|--|
| Focus A | 2 60            | — 14023 / EIN 13604  |

#### Circularity

| Minimum post-consumer recycled content | 51%              |
|--|------------------|
| Recyclability                          | Fully recyclable |

#### Fire safety

| Country | Fire standard | Class    | The glass wool core of the tiles is tested and classified on non-combustible according to EN ISO 1182. |
|---------|---------------|----------|--|
| Europe  | EN 13501-1    | A2-s1,d0 | non-combustible according to ETV 13O 1162.   |

#### **Humidity Resistance**

Class C, relative humidity 95% and 30°C, according to EN 13964:2014

#### Visual appearance

White Frost, nearest NCS colour sample S 0500-N, 85% light reflectance. Gloss < 1.

#### Cleanability

Daily dusting and vacuum cleaning. Weekly wet wiping.

#### Accessibility

The tiles are easily demountable. Minimum demounting depth according to installation diagrams.

© Saint-Gobain Ecophon AB Ecophon Focus<sup>™</sup> A, 2024-04-20

#### Installation

Installed according to installation diagrams, installationguides and drawing aid. For information regarding minimum overall depthof system see quantity specification.

#### System weight

The weight of the system (including suspension grid) should be approximately 3 kg/m².

#### **Mechanical properties**

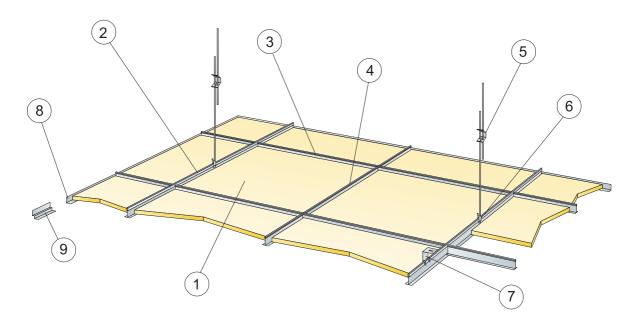

See table about Max live load and Min load bearing capacity and Functional demands, Mechanical properties at www.ecophon.com.

#### CE

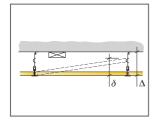

Ecophon ceiling systems are CE marked according to the European harmonized standard EN13964:2014. CE marked construction products are covered by a Declaration of Performance (DOP) which enables customers and users to easily compare performance of products available on the European market.

# Ecophon Focus<sup>TM</sup> B

Ecophon Focus<sup>TM</sup> B are bonded edge-to-edge directly to the soffit surface, creating a ceiling with a smooth appearance. The bevelled edge creates a narrow groove between each tile. For applications where the minimum possible overall depth of system is required.

#### Cradle to Cradle Certified®

This product is Cradle to Cradle Certified® at Bronze level (version 4.0).

#### **Material Health**

This product has received a C2C Certified Material Health Certificate<sup>TM</sup> at the Silver level (standard version 4.0). The C2C Certified Material Health Certificate<sup>TM</sup> is a verification of the health and safety of a product's composition using the Material Health requirements of the Cradle-to-Cradle Certified Product Standard.

#### **Environmental Footprint**

|         | kg CO2 equiv/m² | Life-cycle stages A1 to C4 from EPD, in conformity with ISO |
|---------|-----------------|---|
| Focus B | 4 10            | 14025 / EN 15804  |

#### Circularity

| Minimum post-consumer recycled content | 56%              |
|--|------------------|
| Recyclability                          | Fully recyclable |

© Saint-Gobain Ecophon AB Ecophon Focus™ B, 2024-04-18

#### Fire safety

| Country | Fire standard | Class    | The glass wool core of the tiles is tested and classified as |
|---------|---------------|----------|--|
| Europe  | EN 13501-1    | A2-s1,d0 | non-combustible according to EN ISO 1182.                    |

#### **Humidity Resistance**

Class C, relative humidity 95% and 30°C, according to EN 13964:2014

#### Visual appearance

White Frost, nearest NCS colour sample S 0500-N, 85% light reflectance. Gloss < 1.

#### Cleanability

Daily dusting and vacuum cleaning. Weekly wet wiping.

#### Accessibility

The tiles are not demountable.

#### Installation

Installed according to installation diagrams, installation guides and drawing aid. For information regarding minimum overall depth of system see quantity specification. Rendered surfaces must have sufficient strength to be able to carry the load imposed by the tiles. If doubts, test gluing should be carried out. The surface should always be dry and clean. For best result the surface should be even.

#### System weight

The weight of the system should be approximately 2,5 kg/m<sup>2</sup>

#### **Mechanical properties**

Additional live load has to be fixed to the soffit.

#### CE

Ecophon ceiling systems are CE marked according to the European harmonized standard EN 13964:2014. CE marked construction products are covered by a Declaration of Performance (DOP) which enables customers and users to easily compare performance of products available on the European market.

|   |   | Size, mm    |
|---|---|-------------|
|   |   | 600×600     |
| 1 | Focus B   | 2,8/m²      |
| 2 | Connect Absorber glue (0,25 l/m² - 0,4 l/m² depending on installation conditions)     | as required |
|   | Use Connect Notched spatula to apply the glue.  | -           |
| } | When installing floating ceilings: Connect Wood trim, L=2500, fixed at 500 mm centres | as required |
|   | $\Delta$ Min, overall depth of system: 23 mm  |             |
|   | $\delta$ Min. demounting depth: The system is not demountable                         |             |
|   | Cut visible edges should be painted   | -           |

Application of glue

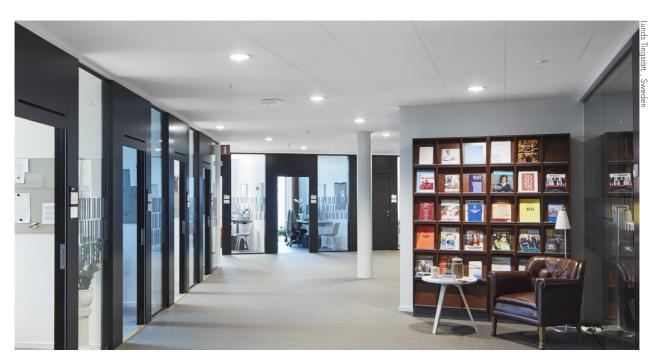

Wood trim for floating installation

Live load/load bearing capacity

# Ecophon Focus<sup>TM</sup> Ds

Ecophon Focus™ Ds has a concealed grid and symmetrical bevelled edge with an even appearance. Increases assembly ease and integration of light fittings and ventilation. For applications where a suspended ceiling with a concealed grid is required, but individual tiles must be easily demountable.

#### Cradle to Cradle Certified®

This product is Cradle to Cradle Certified® at Bronze level (version 4.0).

#### **Material Health**

This product has received a C2C Certified Material Health Certificate<sup>TM</sup> at the Silver level (standard version 4.0). The C2C Certified Material Health Certificate<sup>TM</sup> is a verification of the health and safety of a product's composition using the Material Health requirements of the Cradle-to-Cradle Certified Product Standard.

#### **Environmental Footprint**

|          | kg CO2 equiv/m² | Life-cycle stages A1 to C4 from EPD, in conformity with ISO 14025 / EN 15804 |
|----------|-----------------|--|
| Focus Ds | 4,60            | - 14025 / EIN 13604  |

#### Circularity

| Minimum post-consumer recycled content | 57%              |
|--|------------------|
| Recyclability                          | Fully recyclable |

#### Fire safety

| Country |            | Class    | The glass wool core of the tiles is tested and classified as |
|---------|------------|----------|--|
| Europe  | EN 13501-1 | A2-s1,d0 | non-combustible according to EN ISO 1182.                    |

#### **Mechanical properties**

See table about Max live load and Min load bearing capacity and Functional demands, Mechanical properties at www.ecophon.com.

#### **Humidity Resistance**

Class C, relative humidity 95% and 30°C, according to EN 13964:2014

#### Visual appearance

White Frost, nearest NCS colour sample S 0500-N, 85% light reflectance. Gloss < 1.

#### Cleanability

Daily dusting and vacuum cleaning. Weekly wet wiping.

#### Accessibility

The tiles in size 600x600 and 1200x600 are easliy demountable. The tiles in size 1200x1200 and XL sizes are demountable. Minimum demounting depth according to installation diagrams.

#### Installation

Installed according to installation diagrams, installation guides and drawing aid. For information regarding minimum overall depth of system see quantity specification. The systems are not recommended for small rooms (approximately 2x2 m2). Ceilings with a large amount of integrations require careful planning, design and installation.

© Saint-Gobain Ecophon AB Ecophon Focus™ Ds, 2024-04-18

#### System weight

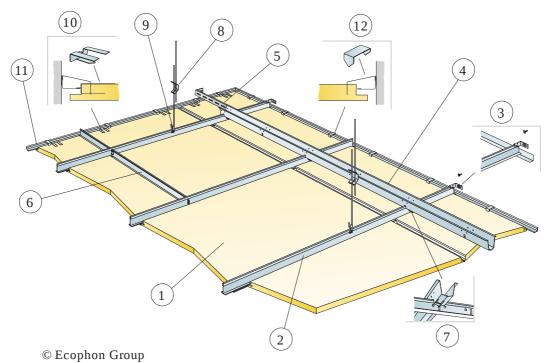

The weight of the system (including suspension grid) should be approximately  $3-4\ kg/m^2$ .

#### CE

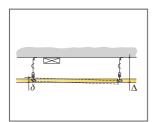

Ecophon ceiling systems are CE marked according to the European harmonized standard EN13964:2014. CE marked construction products are covered by a Declaration of Performance (DOP) which enables customers and users to easily compare performance of products available on the European market.

# Ecophon Focus<sup>TM</sup> Dg

Ecophon Focus<sup>™</sup> Dg conceals the supporting tile edges and creates a distinctive floating appearance. Tiles are easily demountable even in areas where there is a very small overall depth of system. For applications where a unique demountable suspended ceiling is required.

#### Cradle to Cradle Certified®

This product is Cradle to Cradle Certified® at Bronze level (version 4.0).

#### **Material Health**

This product has received a C2C Certified Material Health Certificate<sup>TM</sup> at the Silver level (standard version 4.0). The C2C Certified Material Health Certificate<sup>TM</sup> is a verification of the health and safety of a product's composition using the Material Health requirements of the Cradle-to-Cradle Certified Product Standard.

#### **Environmental Footprint**

|          | kg CO2 equiv/m² | Life-cycle stages A1 to C4 from EPD, in conformity with ISO 14025 / EN 15804 |
|----------|-----------------|--|
| Focus Dg | 4,20            | - 14023 / EIN 13604  |

#### Circularity

| Minimum post-consumer recycled content | 59%              |
|--|------------------|
| Recyclability                          | Fully recyclable |

#### Fire safety

| Country | Fire standard | Class    | The glass wool core of the tiles is tested and classified as non-combustible according to EN ISO 1182. |
|---------|---------------|----------|--|
| Europe  | EN 13501-1    | A2-s1,d0 | non-combustible according to £14 150 1162.   |

#### **Humidity Resistance**

Class C, relative humidity 95% and 30°C, according to EN 13964:2014

#### Visual appearance

White Frost, nearest NCS colour sample S 0500-N, 85% light reflectance. Gloss < 1.

#### Cleanability

Daily dusting and vacuum cleaning. Weekly wet wiping.

#### Accessibility

The tiles in size 600x600 and 1200x600 are easliy demountable. The tiles in size 1200x1200 and XL sizes are demountable. Minimum demounting depth according to installation diagrams.

#### Installation

Installed according to installation diagrams, installation guides and drawing aid. For information regarding minimum overall depth of system see quantity specification. The systems are not recommended for small rooms (approximately 2x2 m2). Ceilings with a large amount of integrations require careful planning, design and installation.

#### System weight

The weight of the system (including suspension grid) should be approximately 3-4 kg/m<sup>2</sup>.

#### **Mechanical properties**

See table about Max live load and Min load bearing capacity and Functional demands, Mechanical properties at www.ecophon.com.

#### CE

Ecophon ceiling systems are CE marked according to the European harmonized standard EN 13964:2014. CE marked construction products are covered by a Declaration of Performance (DOP) which enables customers and users to easily compare performance of products available on the European market.

### **Indoor Air Quality**

# Ecophon Focus<sup>TM</sup> E

Ecophon Focus<sup>TM</sup> E has a recessed visible grid and a tegular edge, creating a ceiling with a shadow effect that accentuates each tile and partially conceals the grid. For applications where an attractive suspended ceiling is required and easy removal of individual tiles is essential.

|--|------------------|
| Recyclability                          | Fully recyclable |

#### Fire safety

| Country | Fire standard | Class    | The glass wool core of the tiles is tested and classified as |
|---------|---------------|----------|--|
| Europe  | EN 13501-1    | A2-s1,d0 | non-combustible according to EN ISO 1182.                    |

#### **Humidity Resistance**

Class C, relative humidity 95% and 30°C, according to EN 13964:2014

#### Visual appearance

White Frost, nearest NCS colour sample S 0500-N, 85% light reflectance. Gloss < 1.

#### Cleanability

Daily dusting and vacuum cleaning. Weekly wet wiping.

#### Accessibility

The tiles are easily demountable. Minimum demounting depth according to installation diagrams.

#### Installation

Installed according to installation diagrams, installationguides and drawing aid. For information regarding minimum overall depthof system see quantity specification.

#### System weight

The weight of the system (including suspension grid) should be approximately 3 kg/m<sup>2</sup>.

#### **Mechanical properties**

See table about Max live load and Min load bearing capacity and Functional demands, Mechanical properties at www.ecophon.com.

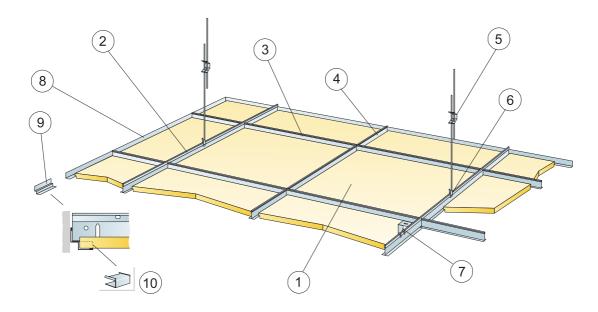

© Saint-Gobain Ecophon AB Ecophon Focus<sup>IM</sup> E, 2024-04-18

#### CE

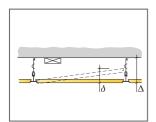

Ecophon ceiling systems are CE marked according to the European harmonized standard EN 13964:2014. CE marked construction products are covered by a Declaration of Performance (DOP) which enables customers and users to easily compare performance of products available on the European market.

#### Visual appearance

White Frost, nearest NCS colour sample S 0500-N, 85% light reflectance. Gloss < 1.

#### Cleanability

Daily dusting and vacuum cleaning. Weekly wet wiping.

#### Accessibility

The tiles are not demountable.

#### Installation

Installed according to installation diagrams, installation guides and drawing aid. For information regarding minimum overall depth of system see quantity specification. For best result the surface should be even, however an acceptable result could be achieved on slightly uneven surfaces. If very uneven surfaces – installation of furring (evenly spaced timber battens) as the substrate for the tiles is recommended.

#### System weight

The weight of the system should be approximately 2,5 kg/m $^2$ 

#### **Mechanical properties**

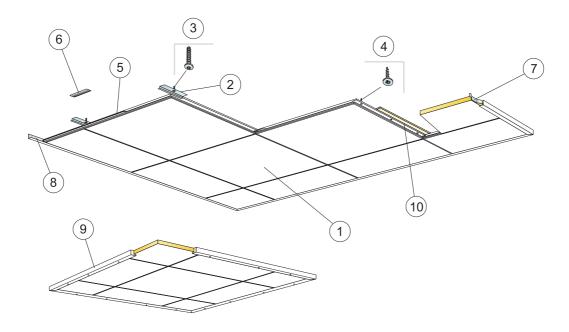

Additional live load has to be fixed to the soffit.

#### CE

Ecophon ceiling systems are CE marked according to the European harmonized standard EN 13964:2014. CE marked construction products are covered by a Declaration of Performance (DOP) which enables customers and users to easily compare performance of products available on the European market.

# Ecophon Focus™ Lp

Ecophon Focus™ Lp has a semi-concealed grid system used for highlighting direction in a room. Features a wide gap between tiles in the emphasised direction and a narrow gap in the other. The system consists of standard Focus™ Lp tiles and Focus™ Lp Technical tiles.

#### **SYSTEM RANGE**

### Cradle to Cradle Certified®

This product is Cradle to Cradle Certified® at Bronze level (version 4.0).

Ecophon Focus™ Lp, 2024-04-18 © Saint-Gobain Ecophon AB

#### **Material Health**

This product has received a C2C Certified Material Health Certificate<sup>TM</sup> at the Silver level (standard version 4.0). The C2C Certified Material Health Certificate<sup>TM</sup> is a verification of the health and safety of a product's composition using the Material Health requirements of the Cradle-to-Cradle Certified Product Standard.

#### **Environmental Footprint**

|          | kg CO2 equiv/m² | Life-cycle stages A1 to C4 from EPD, in conformity with ISO 14025 / EN 15804 |
|----------|-----------------|--|
| Focus Lp | 4,66            | — 14023 / EN 13604   |

#### Circularity

| Minimum post-consumer recycled content | 57%              |
|--|------------------|
| Recyclability                          | Fully recyclable |

#### Fire safety

| Country | Fire standard | Class    | The glass wool core of the tiles is tested and classified as non-combustible according to EN ISO 1182. |
|---------|---------------|----------|--|
| Europe  | EN 13501-1    | A2-s1,d0 | non-combustible according to ETV 130-1162.   |

#### **Humidity Resistance**

Class C, relative humidity 95% and 30  $^{\circ}$  C, according to EN 13964:2014

#### Visual appearance

White Frost, nearest NCS colour sample S 0500-N, 85% light reflectance. Gloss < 1.

#### Cleanability

Daily dusting and vacuum cleaning. Weekly wet wiping.

#### Accessibility

The tiles are easily demountable. Minimum demounting depth according to installation diagrams.

#### Installation

Installed according to installation diagrams, installation guides and drawing aid. For information regarding minimum overall depth of system see quantity specification. The systems are not recommended for small rooms (approximately 2x2 m2). Ceilings with a large amount of integrations require careful planning, design and installation.

#### System weight

The weight of the system (including suspension grid) should be approximately 3-4 kg/m<sup>2</sup>.

#### **Mechanical properties**

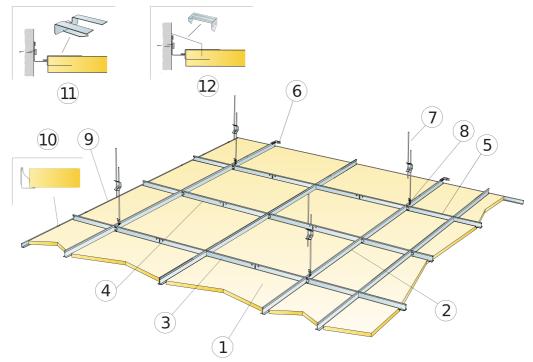

See table about Max live load and Min load bearing capacity and Functional demands, Mechanical properties at www.ecophon.com. For the Technical tiles installed according to M391 there is a load bearing capacity of 100 N for each Main runner HD per 1200 mm. This gives a total load bearing capacity of 200 N for a load evenly distributed on two Main runners.

#### CE

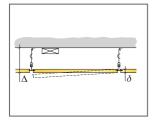

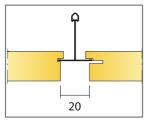

Ecophon ceiling systems are CE marked according to the European harmonized standard EN 13964:2014. CE marked construction products are covered by a Declaration of Performance (DOP) which enables customers and users to easily compare performance of products available on the European market.

| 5  | Connect Adjustable hanger, installed at 1500 mm centres (max. distance from wall 450 mm) | 1,1/m²   |
| 6  | Connect Hanger Clip (not to be used in swimming hall environments)                       | 0,7/m²   |
| 7  | Connect Angle trim, fixed at 300 mm centres  | as required  |
| 8  | Connect Wall spring  | 3pcs/on every cut perimeter tile with only 1 supporting edge |
| 9  | Connect Support clip Dg20  | 4per perimeter tile, cut on the long side                    |
| 10 | Connect Perimeter tile clip  | 1/300-400mm on any cut edge                                  |
|    | $\Delta$ Min. overall depth of system: 115 mm  |  |
|    | $\delta$ Min. demounting depth: 20 mm  |  |
|    | For luminaire integration in panels use Connect Bridging                                 |  |

Distance between Focus Lp tiles

Non-supported edges meeting with space for cross-tee.

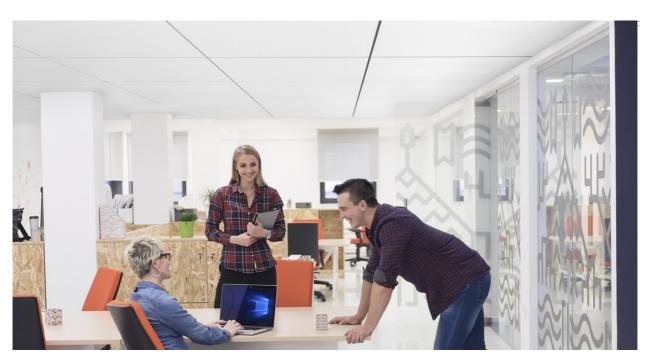

Live load/load bearing capacity

# Ecophon Focus™ SQ

Ecophon Focus™ SQ bonds directly to the soffit surface. Tiles are installed with a gap between each tile, creating a ceiling with a smooth appearance. For applications where the minimum possible overall depth of system is required due to limited space or other reason.

#### Cradle to Cradle Certified®

This product is Cradle to Cradle Certified® at Bronze level (version 4.0).

#### **Material Health**

This product has received a C2C Certified Material Health Certificate<sup>TM</sup> at the Silver level (standard version 4.0). The C2C Certified Material Health Certificate<sup>TM</sup> is a verification of the health and safety of a product's composition using the Material Health requirements of the Cradle-to-Cradle Certified Product Standard.

#### **Environmental Footprint**

#### Circularity

| Minimum post-consumer recycled content | 57%              |
|--|------------------|
| Recyclability                          | Fully recyclable |

#### Fire safety

| Country | Fire standard | Class    | The glass wool core of the tiles is tested and classified as |
|---------|---------------|----------|--|
| Europe  | EN 13501-1    | A2-s1,d0 | non-combustible according to EN ISO 1182.                    |

#### **Humidity Resistance**

Class C, relative humidity 95% and 30°C, according to EN 13964:2014

#### Visual appearance

White Frost, nearest NCS colour sample S 0500-N, 85% light reflectance. Gloss < 1.

#### Cleanability

Daily dusting and vacuum cleaning. Weekly wet wiping.

#### Accessibility

The tiles are not demountable.

#### Installation

Installed according to installation diagrams, installation guides and drawing aid. For information regarding minimum overall depth of system see quantity specification. Rendered surfaces must have sufficient strength to be able to carry the load imposed by the tiles. If doubts, test gluing should be carried out. The surface should always be dry and clean. For best result the surface should be even, however an acceptable result could be achieved on slightly uneven surfaces.

#### System weight

The weight of the system should be approximately 2,5 kg/m<sup>2</sup>

#### **Mechanical properties**

Additional live load has to be fixed to the soffit.

#### CE

Ecophon ceiling systems are CE marked according to the European harmonized standard EN13964:2014. CE marked construction products are covered by a Declaration of Performance (DOP) which enables customers and users to easily compare performance of products available on the European market.

#### **Indoor Air Quality**

### **Environmental Footprint**

|                   | kg CO2 equiv/m² | Life-cycle stages A1 to C4 from EPD, in conformity with ISO 14025 / EN 15804 |
|-------------------|-----------------|--|
| Focus Flexiform A | 3,1             | 14023 / LIN 13604  |

#### Circularity

| Minimum post-consumer recycled content | 39%              |
|--|------------------|
| Recyclability                          | Fully recyclable |

#### Fire safety

| Country | Fire standard | Class    | The glass wool core of the tiles is tested and classified as non-combustible according to EN ISO 1182. |
|---------|---------------|----------|--|
| Europe  | EN 13501-1    | A2-s1,d0 | non-combusible according to LIN 130-1162.  |

#### **Humidity Resistance**

Class C, relative humidity 95% and 30°C, according to EN 13964:2014

#### Visual appearance

White Frost, nearest NCS colour sample S 0500-N, 85% light reflectance. Gloss < 1.

#### Cleanability

Daily dusting and vacuum cleaning. Weekly wet wiping.

#### Accessibility

The tiles are not demountable.

#### Installation

Installed according to installation diagrams, installation guides and drawing aid. (Please note: Extreme incident light, near windows or other light sources, can create undesired shadow effects on the structured surface on curved installations.)

#### System weight

The weight is approximately 3  $kg/m^2$ , depending on the installation method.

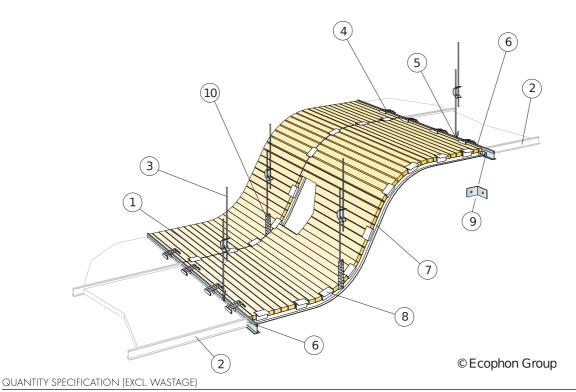

#### **Mechanical properties**

Additional live load has to be fixed to the soffit.

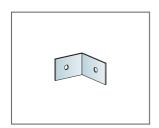

#### CE

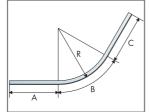

Ecophon ceiling systems are CE marked according to the European harmonized standard EN13964:2014. CE marked construction products are covered by a Declaration of Performance (DOP) which enables customers and users to easily compare performance of products available on the European market.

|  | Size, mm            |             |             |             |

# Ecophon Focus Edge™ 500

Ecophon Focus Edge<sup>TM</sup> 500 is a system used as free hanging unit(s) in applications where the installation of a wall-to-wall ceiling is not possible. The system consists of profiles and corners which together form a well designed perimeter trim.

#### **SYSTEM RANGE**

| Size, mm        |                  |                  |           |           |

Connect Edge 500 in position for Focus E installation

#### Acoustic

Ecophon Focus Edge 500 is a perimeter component. For acoustic data on the system - please see corresponding ceiling system (Focus Ds, Focus Dg or Focus/Master E).

#### Circularity

Fully recyclable.

#### Fire safety

#### Installation

Installed according to installation diagrams, installationguides and drawing aid. For information regarding minimum overall depthof system see quantity specification.

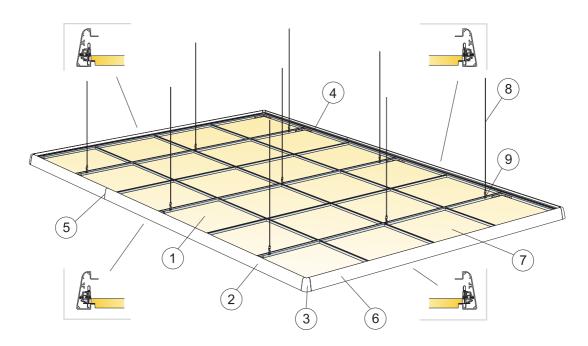

#### **Mechanical properties**

Additional live load has to be fixed to the soffit.

#### CE

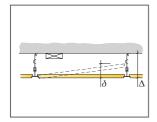

Ecophon ceiling systems are CE marked according to the European harmonized standard EN 13964:2014. CE marked construction products are covered by a Declaration of Performance (DOP) which enables customers and users to easily compare performance of products available on the European market.

# Ecophon Focus<sup>TM</sup> Levels

Focus Levels is a new design system consisting of tiles with three different thicknesses: 40, 30 and 20 mm. The tiles are glued directly next to each other and by varying the tile thickness, you can create unique design solutions with built in level shiftings. The system is easy to install in ceilings and/or on walls. Use Connect Absorber glue for best result. The tiles are made of glass wool and the exposed surface has a Akutex surface of highest quality. The tiles are not demountable.

life-cycle stages A1 to C4 from EPD, in conformity with ISO 14025 / EN 15804

#### Circularity

| Minimum post-consumer recycled content (20 mm) | 58%                 |
|--|---------------------|
| Minimum post-consumer recycled content (30 mm) | 62%                 |
| Minimum post-consumer recycled content (40 mm) | 64%                 |
| Recyclability                                  | Fully<br>recyclable |

#### Fire safety

| Country | Fire standard | Class    |
|---------|---------------|----------|
| Europe  | EN 13501-1    | A2-s1,d0 |

The glass wool core of the tiles is tested and classified as non-combustible according to EN ISO 1182.

#### **Humidity Resistance**

Class C, relative humidity 95% and 30°C, according to EN 13964:2014

#### Visual appearance

White Frost, nearest NCS colour sample S 0500-N, 85% light reflectance. Gloss < 1.

#### Cleanability

Daily dusting and vacuum cleaning. Weekly wet wiping.

#### Accessibility

The tiles are not demountable.

#### Installation

Installed according to installation diagrams, installation guides and drawing aid. For information regarding minimum overall depth of system see quantity specification. Rendered surfaces must have sufficient strength to be able to carry the load imposed by the tiles. If doubts, test gluing should be carried out. The surface should always be dry and clean. For best result the surface should be even, however an acceptable result could be achieved on slightly uneven surfaces.

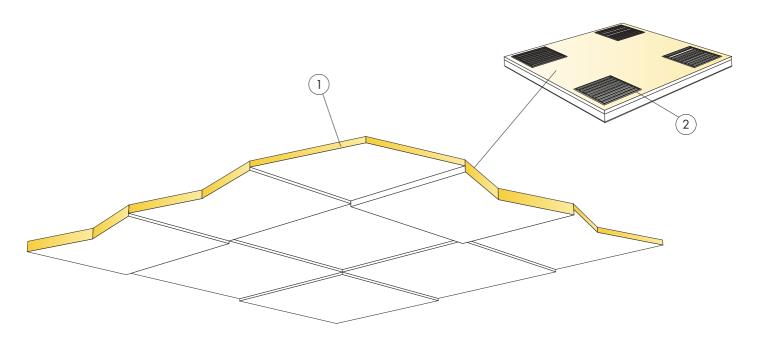

#### **Mechanical properties**

Additional live load has to be fixed to the soffit.

#### CE

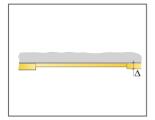

Ecophon ceiling systems are CE marked according to the European harmonized standard EN 13964:2014. CE marked construction products are covered by a Declaration of Performance (DOP) which enables customers and users to easily compare performance of products available on the European market.
