

Case Study

Retail

Kentucky Fried Chicken

Facts about the project

Location: KFC, London W1, United Kingdom

Designer: Ghost Projects

Products: Ecophon Focus Ds XL

This is the first Ecophon project for KFC through designer Ghost Projects London. This is a flagship restaurant for KFC and they were looking for a unique design. Focus Ds 1200 x 1200 was used as it is a larger than normal tile giving a near seamless appearance.

The Focus Ds system consists of Focus Ds tiles and Ecophon Connect grid system which offers a crisp white akutex finish and a concealed grid and symmetrical edge design, allowing easier assembly, integration of light fittings and ventilation.

The ceiling has an even appearance, with the bevelled edges forming a discreet groove between the tiles yet offering the ability to demount to access services in the void above.

Focus Ds is a class A sound absorber and will give a good reduction in reverberation and an overall reduction in unwanted noise in the restaurant.
