West Street Vineyard

Facts about the project

Location: West Street Vineyard, Coggeshall, Essex

Architect: Dayle Bayliss

Contractor: Seamans Building

Project Value: £8000

Products: Ecophon Solo, Gedina A, Hygiene Meditec

West Street Vineyard opened the doors of its award-winning English Wine Barn in April 2013. The visitor centre's facilities include a wine school, an 80-seat café, a wine bar, conference facilities and an outdoor terrace and the building has been recognised by the Royal Institute of Chartered Surveyors for its eco-friendly features.

The project is the result of 18 months planning, design and project management by Dayle Bayliss Associates LLP and construction by Seamans Building of Thurston near Bury St Edmunds.

The glass and timber structure has a natural slate roof and neutral interiors. Ecophon Solo™ Panels were specified throughout the basement, which is used for wine tasting. In addition to the acoustic benefits, Solo™ Panels were chosen for their aesthetic appeal, availability in several shapes and sizes, flexibility and sustainability.

Ecophon Solo™ Panels in soft slate and Gedina™ A tiles were used in the toilet, while Hygiene Meditec™ tiles were installed in the kitchen areas.
